Auction Sales To-day.

TIMIS WORK was commenced in November, 1864, the computation of the author then being that it could be comprised in one thousand four hundred pages, and would occur yews years.

Many unlooked for obstructions, chiefly of a typegraphical nature, materially retarded the progress. of the work in the first instance, and these being levercome, the author discovered that he had underestimated the extent and the importance of the vast task he had undertaken, and that it would occupy fully double the time and space which he had at the outset computed.

The publication of a work of such magnitude.

and presching so many and such varied obstacles, seldom falls to the limited resources of one single have. individual, as occurs in this case. The first part of the work is now issued, partly at the request of the author and partly to afford the Poreigo Community of China an opportunity of extending that assistance to the publisher, which under the circumstances is usually so freely accorded. The price of the book complete, will be \$30, and it will be published in four parts at \$7,50 each. But this objection presents itself to the sale of the parts separately, should the purchaser

of one or more parts not take the others, a number of incomplete, and consequently valueless; copies will be left on the publisher's hands. To remedy this objection, in consularation of the circumstances already alluded to, it is hoped that those who see fit to patronice the undertaking by purobsering the first part, will not object to signing an a gagement to take the remaining parts as they appear, or should they prefer it, to pay for the entire work in advance.
